Ticket HD-004: Employee Forgot Windows Password

Ticket ID: HD-004

Date Reported: November 12, 2026

Department: Marketing

Issue Category: Password / Account Management

Priority: Medium

Status: Resolved (Simulated)

User Description:

An employee reports being unable to access their Windows workstation because they forgot their password. They need access to their computer to complete their daily assignments.

Initial Assessment:

The issue appears to be related to forgotten login credentials. The technician must verify the employee's identity before assisting with account recovery.

Troubleshooting Steps:

1. Confirm the employee's identity using the organization's approved verification procedure.
2. Determine whether the employee uses a local Windows account or an organizational account.
3. Direct the employee to the organization's approved password recovery process.
4. If authorized, assist with resetting the password through the appropriate account management system.
5. Instruct the employee to create a unique password that meets company security requirements.
6. Verify that the employee can successfully sign in.
7. Remind the employee not to share passwords with coworkers or IT personnel.

Resolution:

The simulated technician verifies the employee's identity and assists with the approved password recovery process. The employee successfully signs in using the updated credentials.

Final Status: Resolved

Skills Demonstrated: Password management, account recovery, identity verification, Windows support, access management, and security awareness.
