Ticket HD-003: Office Printer Not Responding

Ticket ID: HD-003

Date Reported: November 12, 2026

Department: Accounting

Issue Category: Hardware / Printer Support

Priority: Medium

Status: Resolved (Simulated)

User Description:

An employee reports that they are unable to print documents from their Windows computer. The office printer appears online, but print jobs remain stuck in the queue.

Initial Assessment:

The issue may be caused by a communication problem between the computer and printer, outdated printer drivers, a disconnected printer, or a stuck print job.

Troubleshooting Steps:

1. Verify that the printer is powered on.
2. Confirm that the printer is connected to the correct network or computer.
3. Check the printer display for error messages or paper jams.
4. Open Windows Settings and navigate to Bluetooth & devices, then Printers & scanners.
5. Confirm that the correct printer is selected as the default printer.
6. Review the print queue for stuck or pending jobs.
7. If necessary, clear the stuck print jobs and restart the printer.
8. Test the printer by sending a new document.

Resolution:

The simulated technician identifies a stuck print job in the print queue. After clearing the queue and restarting the printer, a test document prints successfully.

Final Status: Resolved

Skills Demonstrated: Hardware troubleshooting, printer configuration, Windows support, device management, problem-solving, and technical documentation.
