Ticket HD-006: Employee Unable to Send or Receive Emails

Ticket ID: HD-006

Date Reported: November 12, 2026

Department: Sales

Issue Category: Email / Software Support

Priority: High

Status: Resolved (Simulated)

User Description:

An employee reports that their company email account is not sending or receiving messages. Emails remain in the outbox, and incoming messages are not appearing in the inbox.

Initial Assessment:

Possible causes include internet connectivity problems, incorrect email account settings, mailbox storage limitations, authentication issues, or an email service outage.

Troubleshooting Steps:

1. Confirm that the employee has an active internet connection.
2. Determine whether the issue affects one employee or multiple employees.
3. Check whether the email service is experiencing an outage.
4. Verify that the employee is signed into the correct email account.
5. Review the outbox for messages that may be stuck.
6. Check available mailbox storage.
7. Test email access through the organization's approved webmail portal.
8. If necessary, escalate the issue to the email administrator.
9. Send a test email to verify that sending and receiving functionality has been restored.

Resolution:

The simulated technician discovers that the email application is temporarily disconnected from the email service. After reconnecting the account, sending and receiving functionality is restored.

Final Status: Resolved

Skills Demonstrated: Email troubleshooting, account management, network connectivity, software support, problem-solving, and technical documentation.
