Ticket HD-001: Employee Account Locked

Ticket ID: HD-001

Date Reported: November 12, 2026

Department: Human Resources

Issue Category: Account Access

Priority: High

Status: Resolved (Simulated)

User Description:

An employee reports being unable to log into their Windows computer. The system displays a message indicating that their account has been locked after multiple unsuccessful login attempts.

Initial Assessment:

The account may have been locked due to repeated incorrect password attempts or an authentication issue.

Troubleshooting Steps:

1. Confirm the employee's identity using the organization's approved verification process.
2. Check whether the account is locked in the authorized account management system.
3. Review available authentication logs for repeated failed login attempts.
4. Determine whether the attempts were caused by an incorrect password or potentially suspicious activity.
5. If appropriate, unlock the account and assist with a password reset according to company policy.

Resolution:

The simulated technician verifies the employee's identity, confirms the account lockout, and follows the approved account recovery procedure. The employee successfully logs in.

Final Status: Resolved

Skills Demonstrated: Account troubleshooting, authentication, Windows support, security awareness, customer service, and technical documentation.
